

# UNDER CONSTRUCTION

Construction will impact pedestrian traffic around the Allen County Community Corrections Day Reporting Center over the next several weeks. Contractors for the City of Fort Wayne will be installing a new water main under the sidewalk in front of our building. The Contractor is utilizing a horizontal boring machine to install the water main. This equipment will be placed at the corner of Harrison and Superior on the sidewalk, as well as some support vehicles parked in the east parking area. A temporary sidewalk will be installed between the existing sidewalk and the exterior wall of our building. Safety fencing will also be in place to keep pedestrians out of the construction area.
